

# Many Products, No Security

Expensive products with complicated and overlapping functionality aren't meeting today's security and system management needs.

Ransomware and other malware attacks are continually in headlines.

**60%**  
of malware is undetected

**90%**  
of successful attacks occur because of vulnerabilities & misconfigurations

Frequency of security breaches and exploits illustrates a fundamental shortcoming in how security is approached.

2017-2021  
Spending on security products & services  
**\$1 Trillion**

WHY NOT  
**INVEST LESS,  
GET MUCH MORE**

Average cost of a data breach to a business  
**\$3.8 Million**

## WHAT'S THE SOLUTION?

A platform-centric approach with applicable, effective tools to transform endpoint management and security.

Just as a computing infrastructure can be provisioned from the cloud, a similar approach is needed for IT systems management and security. A platform of tools can effectively handle tasks.

**Query**  
systems to get visibility

**Monitor**  
changes as they occur

**Analyze**  
systems for risks and threats

**Respond**  
to fix issues

Absorbing the cost of product features that aren't applicable or useful wouldn't be necessary with task specific tools. Installation and training burdens would be drastically reduced. And with proper tools, security and system management concerns would be resolved.

## HOW DO I MANAGE COSTS?

Whether using a CapEx or OpEx model, purchasing products with overlapping capabilities contributes to cost overruns. Provisioning tools as needed from the cloud and paying only for actual usage helps control costs.

Effective security and system management tools

Self-provision tools from the cloud

Pay only for actual use of tools

No training classes or certifications required

## SaaS-BASED SECURITY AND SYSTEMS MANAGEMENT TOOLS

VULNERABILITY MANAGEMENT

PATCH MANAGEMENT

COMPLIANCE MANAGEMENT

ENDPOINT THREAT DETECTION & RESPONSE

ASSET MANAGEMENT

ENDPOINT MANAGEMENT

## SanerNow

Your Platform for Managing and Securing Endpoints

Reduce up to 60% of IT product investment

One cloud-based platform, multiple use cases: Simplify IT security and management. Reduce costs.

With the SanerNow platform:

- Deploy tools in minutes
- Get rapid results
- Pay for what is used

Use an effective platform/tool approach for your endpoint security and system management.

- Reduce security risk
- Reduce cost
