# FRESHSERVICE + SANERNOW

SOLUTION BRIEF

Aligning ITSM with SecOps

Cyberattacks are increasing tremendously, and attackers are waiting to cause reputation and financial losses for businesses. To combat these cyberattacks, it is pivotal that ITSM strategy must align with SecOps (Security Operations). With SecOps functions merged within the ITSM landscape, organizations can build a robust cyberattack prevention process and keep numerous security mishaps at bay.

Freshservice + SecPod SanerNow Integration

Freshservice and SecPod SanerNow integration enable you to get continuous visibility over the IT Assets and automatically discover and eliminate the vulnerabilities and security risks across them. This integration eliminates the chaos of dealing with multiple-point solutions and provides a single solution to manage IT assets and risk exposures. With SanerNow, you can gain holistic and deeper visibility into your IT, discover and eliminate anomalies, detect and assess vulnerabilities, remediate vulnerabilities with integrated patching and 100+ security controls, and abide by compliance with top industry compliance benchmarks.

Key Features & Benefits of Integrating Freshservice and SecPod SanerNow

Gain Continuous Visibility into IT Asset Exposure

Monitor your IT infrastructure continuously, gain control over hardware and software inventory, and detect malicious IT assets.

Eliminate Anomalies and Normalize your IT Infrastructure

Discover and fix dangerous anomalies and outliers in your IT network and eliminate the risks due to the most obvious attack vectors.

Real-time Detection of Vulnerabilities and Security Risks

Run the industry's fastest vulnerability scans and detect vulnerabilities and security risks in real-time and assess them thoroughly.

Harden Systems and Achieve Conformance with Top Industry Benchmarks

Achieve conformance with top industry benchmarks like HIPAA, PCI, ISO, and NIST and create custom security policies in SanerNow.
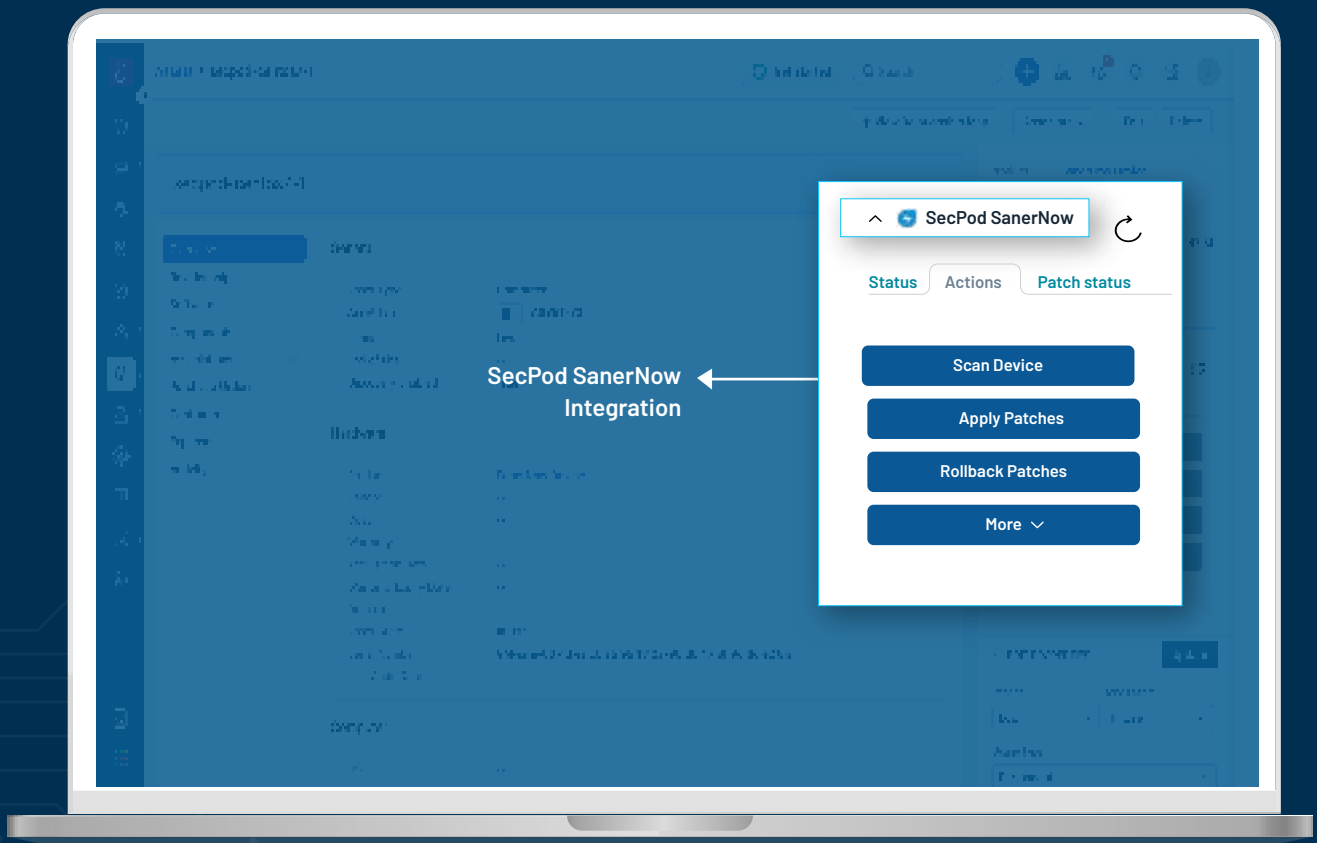

## Timely Remediation with Integrated Patching

Automate patching for all major operating systems like Windows, Mac, Linux, and 400+ third-party applications.

Remediation Controls Beyond Patching to Eliminate Attack Surface

Go beyond patching and leverage 100+ security remediation controls to mitigate numerous security risks.

About SecPod

SecPod is a cyber security technology company. We prevent cyberattacks. We do everything to prevent attacks on the computing environment. Our product helps implement cyber hygiene measures, so attackers have a tough time piercing through.

Our SanerNow CyberHygiene platform provides continuous visibility to the computing environment, identifies vulnerabilities and misconfigurations, mitigates loopholes to eliminate attack surface, and helps automate these routines. Our product philosophy is offering simplicity and automation to make the job of security administrators slightly better.
